EiG's CEO Receives Certificate in Global BioExecutive Program

San Francisco – March 31, 2006- Executive Impact Group's CEO Hagit Glickman participated and received a certificate in the Global BioExecutive program at the University of California at Berkeley. Participants and faculty were from a wide range of global companies including Genentech, Roche, BioMarin, Chiron, Wyeth and Boston Scientific.

The Global BioExecutive Program explores current issues and future trends in leading and managing bioscience companies. Executives participating in the program gain insight and networks into delivering bottom line value by maneuvering the complex variables of this growing industry from World-renowned faculty.

The Global BioExecutive Program at UC Berkeley's Center for Executive Development examines the strategies and tactics that Life Sciences companies can use to successfully deal with identifying and managing the risks in drug and device development from R&D through clinical trials to commercialization; Planning for and building successful alliances and partnerships; Maximizing the product lifecycle.

"I was very impressed by the level of participation and insights gained from world class faculty who are practicing industry leaders at the world's leading biotech companies." Dr. Glickman stated.
